Diesel injectors clog over time due to fuel sediment buildup in the nozzles. Perform an injector overhaul every 100,000 to 150,000 miles, or as needed, to restore proper diesel injection pump function.

Diesel Injection Pump Repair | It Still Runs
From these two things, a host of problems can surface. Let's take a look at 4 common fuel injector pump complications. Problem #1 - Dirty Fuel. A clean diesel fuel pump injector is a happy diesel fuel pump injector. Over time, residue can build up in the fuel system, and enough gunk, grime and grease can clog up the entire fuel injector pump.

4 Common Diesel Fuel Injection Pump Problems
Injection system control is undertaken by electronically control-ling the actuators. The injection quantity and timing are determined by controlling the duration and timing in which current is applied to the TWV (Two-Way Valve) in the injector. Injection pressure is determined by controlling the SCV (Suction Control Valve) in the supply pump. 5)
