Right now, the Earth's average surface temperature is about 80 degrees F (300 kelvin, which is how they measure it). Some scientists speculate that the surface temperature would drop by a factor of two every two months. In other words, two months after the sun went out, the temperature would drop to -189 degrees F (150 kelvin) and two months after that, it would reach

AllMusic Review by Stephen Thomas Erlewine [+] Kenny Chesney 's stardom snuck up quietly. He had a string of modest successes during the late '90s, but he never made crossover waves until 2002's No Shoes, No Shirt, No Problems, when his steady touring and steady shift toward adult pop paid off with his first number one album, but that was nothing compared to the stunning first-week sales of its successor, When the Sun Goes Down, which also debuted at number one to the very healthy sales of ...

When the sun goes down, out comes the wedding gown,
swishing and turning, my stomach is churning. when the sun
goes down, out comes a clown, messing around, just for a
pound. When the sun goes down, Out comes a crown,
Underneath a royal head, And fast asleep in bed. When the sun
goes down, Out comes a frown, It is time to sleep, Wake at the
beep.

When the Sun Goes Down This song is by Arctic Monkeys and appears on the single When the Sun Goes Down (2005) and on the album Whatever People Say I Am, That's What I'm Not (2006). I said who's that girl there? I wonder what went wrong so that she had to roam the streets She don't do major credit cards, I doubt she does receipts It's all not quite legitimate And what a scummy man ...
