Vibration and Inversion Exercise Equipment: Do They Work?

Vibration plates move at different frequencies, some as high as 30 to 50 vibrations per second. As such, your muscles contract with incredible speed, as if you were exercising. Of course, simply standing on a vibration plate doesn't have the same toning effect as weight training would. But any movement is better than no movement. And although the research is limited in regards to the muscle toning effects of vibration plates, there is plenty of anecdotal evidence online.
